Fifth Quiz (optional)

- REMARKS:
1. Hand held calculator is allowed,
 2. Open book quiz,
 3. Formula sheets are attached,
 4. Marks distribution:
 - Question #1: 3 points
 - Question #2: 3 points
 - Question #3: 4 points
 5. Justify all your answers.

# 1	
# 2	
# 3	

1. Problem 4.1(a) in W&J.
2. Problem 4.3 in W&J.
3. In the diagram of figure 1, $n_w(t)$ denotes a white Gaussian noise with power spectral density $S_w(f) = \frac{\mathcal{N}_0}{2}$ and $r = y(0)$. Express \bar{r} , $Var(r)$ as a function of $\mathcal{N}_0/2$.
Hint: You may interchange $E[\]$ and \int and we recall that:

$$\begin{aligned}
 f(t) * g(t) &= g(t) * f(t) \\
 &= \int_{-\infty}^{\infty} f(\alpha)g(t - \alpha)d\alpha \\
 &= \int_{-\infty}^{\infty} g(\alpha)f(t - \alpha)d\alpha
 \end{aligned}$$
